NABIL FAKIH-GOMEZ, MD. MSC. FFPS. IBCS. *KEY LEADERSHIP MENTOR*

Dr. Nabil FakiH Gómez is an international reference in Facial Plastic Surgery and Cranio-Maxillo-Facial Surgery, in which he is a certified specialist. He currently serves as the Vice President of the Spanish Society of Facial Plastic Surgery, Director of Oculoplastic Surgery at the European Academy of Facial Plastic Surgery, and Associate Member of the American Academy of Facial Plastic and Reconstructive Surgery. He is also the author and co-author of several scientific manuscripts and books on facial plastic and reconstructive surgery.

Dr. Nabil is an international educator driven by a passion for sharing knowledge and advancing the training of surgeons. He is the former Director of the Fellowship Program of the Spanish Society of Facial Plastic Surgery and a faculty member at the International Aesthetic Academy. His international scientific recognition has led him to be selected as a Key Opinion Leader (KOL) for various commercial brands.

He is the owner and Medical Director of FakiH Hospital, where he also serves as the Head of the Department of Facial Plastic and Cranio-Maxillofacial Surgery. His extensive experience as a speaker—combining science and passion—has led him to participate in over 400 international courses, delivering lectures on Facial Plastic Surgery and Aesthetic Medicine.

He has authored and co-authored numerous scientific publications and books. His strong commitment to knowledge sharing and advancing physician education inspired him to create FACEPERT, a platform that offers truthful, scientific, and in-depth training for both novice and experienced medical professionals.

WHAT DOES THE MASTERCLASS INCLUDE?

Full Immersion

Keynote Lectures

Scientific Evidence

Anatomical Correlation

Live Demonstrations

Article Review

Tips & Advices

Complications Management

FACEEXPERT
ACADEMY

MASTERCLASS

A 360° VIEW

The most comprehensive course on Dr. Nabil Fakih's techniques, including his published articles and successful results:

- Step-by-step keynote lectures
- Clinical evaluation of the entire periorbital region with advanced anatomical knowledge
- Detailed walkthrough of all published surgical techniques
- Live surgery on volunteer patients

COURSE DIRECTION

CONFERENCE VENUE

Address: Avenida Manuel Fraga Iribarne 3

Zip Code: 29620 Torremolinos - Malaga, Spain

- Keynote presentation and Live Surgery
 - Check-in: 8:00 am
 - Check-out: 08:30 pm

MODULES AND PRICES

MASTERCLASS + CATERING

1. **Masterclass (2 days):** Masterclass Keynote & Eyelids Live Surgery (19 & 20 September 2026)
 - Presale Price: 4500 EUR
 - After 1 August 2026: 4900 EUR

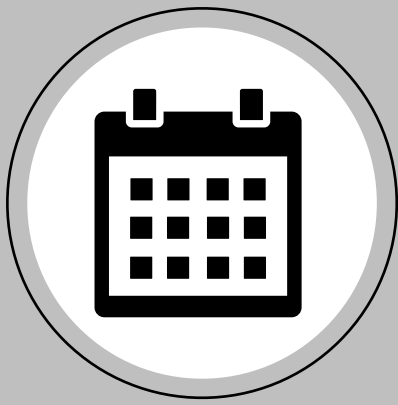

LIMITED PLACES

CONFERENCE VENUE

Registration is on a first-come, first-served basis to guarantee a spot

- Registration deadline: 1 September 2026
- Course registration: ceo@faceexpert.com
- Phone/WhatsApp: +34 603 777 777
- To register: Please send your medical specialty certificate
- Open exclusively to:
 - Maxillofacial Surgeons
 - Plastic Surgeons
 - ENT Specialists (Otolaryngologists)
 - Ophthalmologists

Registrations: ceo@faceexpert.com

PROGRAM

Day 1

Masterclass on Dr. Nabil Fakhri's techniques and Live Surgery of Volumetric Contouring & Boomerang Technique

Day 2

Masterclass on Dr. Nabil Fakhri's techniques and Live Surgery of Deep Plane Direct Browlift & Infra-Brow Fat Lift

SATURDAY 19, SEPTEMBER

MASTERCLASS + LIVE SURGERY

- **08:00 – 09:00:** Upper Blepharoplasty Surgery (Volumetric Contouring Technique). Step by Step Keynote.
- **09:00 – 14:00:** Upper Blepharoplasty Surgery (Volumetric Contouring Technique). Live Surgery
- **14:00 – 15:00:** Lunch
- **15:00 – 16:00:** Lower Blepharoplasty Surgery (Boomerang Technique). Step by Step Keynote.
- **16:00 – 20:00:** Lower Blepharoplasty Surgery (Boomerang Technique). Live Surgery.

SUNDAY 20, SEPTEMBER

MASTERCLASS + LIVE SURGERY

- **08:00 – 09:00:** Deep Plane Direct Browlift Surgery. Step by Step Keynote.
- **09:00 – 14:00:** Deep Plane Direct Browlift Surgery. Live Surgery
- **14:00 – 15:00:** Lunch
- **15:00 – 16:00:** Infra Fat-Brow Lift Surgery. Step by Step Keynote.
- **16:00 – 20:00:** Infra Fat-Brow Lift Surgery. Live Surgery.

The live surgery is broadcast from the operating room to the training room. Coffee break will be available in case participants wish to take a break during the surgery.

Registrations: ceo@faceexpert.com

1 Upper Blepharoplasty Volumetric Contouring Concept

Restricted access | Research article | First published online April 29, 2023

Contemporary Upper Blepharoplasty: Volumetric Contouring Concept

[Nabil Fakh-Gomez, MD, MSc](#) , [Juan Martin Zarate, MD, MSc, PhD](#) , [Lessandro Martins, MD](#), [Luis Miguel Lindo Delgadillo, MDS](#), and [Ibrahim Fakh-Gomez, MD](#)  [View all authors and affiliations](#)

The American Journal of Cosmetic Surgery

Upper blepharoplasty has traditionally involved subtractive approaches with excision of different amounts of skin, muscle, and fat. However, this approach often results in iatrogenic acceleration of the normal volume depletion and bone resorption associated with aging, which leads to deepening of the superior sulcus, A-shape deformity and generalized hollowness. In recent years, the concept of periorbital volume restoration and augmentation has shifted the paradigm toward fat preservation and gland repositioning procedures. Herein, we describe the volumetric contouring concept, a contemporary approach for upper blepharoplasty that includes gland repositioning, suspension of the levator aponeurosis, fat transposition or reposition, and adjunctive filling procedures. This concept seeks for long-term restoration of the eyelid-brow complex by addressing every involutational aspect of the aging process, while treating and preventing hollow eyes and A-shaped deformity. In our experience, this approach has enabled us to attain optimal and long-lasting aesthetic results.

2 Lower Blepharoplasty Boomerang Technique

Restricted access | Research article | First published online September 16, 2022

The Boomerang Technique: Redefining Skin-Only Lower Blepharoplasty

[Nabil Fakh-Gomez, MD, MSc](#) , [Mohammad Haneef, MDS](#) , [Juan Martin Zarate, MD, MSc](#) , [Samir Rodriguez-Chaker, MD](#), and [Ibrahim Fakh-Gomez, MD](#)  [View all authors and affiliations](#)

The American Journal of Cosmetic Surgery

Most patients seeking cosmetic surgery of the lower eyelid are mostly concerned with excess skin, fat bags underneath their eyes, and a tired-looking appearance. A variety of techniques and approaches have been described for aesthetic alteration of the lower lid complex. For skin-only transcutaneous lower blepharoplasty, 2 surgical techniques have been described: the only skin flap and the skin pinch. In our experience, many patients seek only skin corrective resection fearing changes in their eye shape and some others have only excess skin. In this article, we will outline our approach to skin-only lower blepharoplasty. The boomerang technique is based only on skin removal with a superolateral vector design and can be incorporated, if needed, with other adjunctive procedures. To our knowledge, no previous article has described a precise and calculated design for skin removal. This serves the purpose of producing an aesthetic reproducible result with additional advantages inherent to the design over other techniques.

3 Direct Browlift Surgery

> *Aesthetic Plast Surg.* 2025 May;49(9):2385-2398. doi: 10.1007/s00266-025-04775-2
Epub 2025 Mar 10.

Deep Plane Direct Brow Lift

Nabil Fakihi-Gomez ¹, Lessandro Martins ², Elie Dagher ³, Pia Maria Obeid ⁴,
Yader Antonio Guzmán-Velázquez ⁵, Cristina Muñoz-Gonzalez ⁶

Brow ptosis is one of the earliest signs of periorbital aging. To surgically correct the aging brow, several brow lift procedures have been documented with varying amounts of success. This refined deep plane direct brow lift technique addresses brow ptosis—a common sign of aging—by providing precise elevation and long-term stability while minimizing visible scarring. In a prospective study of 45 patients (average age 48), the procedure involved transecting and suspending the orbicularis oculi muscle (OOM) to elevate the brow, support brow fat, and reduce depressor muscle activity. Postoperative follow-up (3–18 months) showed stable, symmetrical brow elevation in 97.8% of cases, with minimal and often inconspicuous scarring. Temporary sensory issues resolved within months, and most patients achieved a natural appearance within three months. This technique combines the precision of traditional direct lifts with improved aesthetic outcomes and durability.

4 Infra Brow-Fat Lift Surgery

The infra-brow fat lift/contour technique is a refined surgical approach developed to address infra-brow fat excess and lateral hooding, particularly in Caucasian patients with high-set eyebrows, where traditional upper blepharoplasty may be insufficient. The procedure begins with preoperative photographic documentation and botulinum toxin injections to relax brow depressor muscles. A precise incision is made just below the eyebrow, followed by excision of skin, subcutaneous tissue, and a portion of the orbicularis oculi muscle. The infra-brow fat is then sculpted or reduced, and the soft tissues are anchored to the periosteum using fixation sutures to ensure upward support and long-term stability. Meticulous closure minimizes visible scarring. This technique offers a safe and effective solution that restores a youthful, natural contour to the upper eyelid, with long-lasting results and minimal risk of complications.
